I have an interesting state-level question about fugitive emissions/LDAR.

Hi, Himanshu

Have you seen this new "guidance" from PADEP concerning VOC fugitive emissions at natural gas transmission facilities? This is apparently PADEP's new strategy to keep compressor stations out of case-by-case RACT under the PA RACT II Rule, so we are looking into it. This will have both permitting and planning implications, so I thought you should be aware.. Plus I would like your input in some questions/ideas being the expert in oil/gas regs.

# Ex. 5 Deliberative Process (DP)

Thanks!

Emily, Joseph:

See attached for the fugitives guidance the Department. Although it is titled pertaining to RACT II it has long term implications for our §123.1 reg regardless of whether the facility is TV or State Only.

Dave
